ABHISHEK SALUNKE

Python Developer | Machine Learning & Generative AI

Malegaon, Maharashtra, India | +91 8261850720 | abhisheksalunke7387@gmail.com | linkedin.com/in/abhishek-salunke-860761409 | github.com/abhishek-salunkergb

PROFESSIONAL SUMMARY

Computer Science Engineering graduate (CGPA 8.19, SPPU) with hands-on experience across Python development, applied machine learning, and secure backend design. Completed a data analytics internship at Paarsh Infotech, cutting data-prep time by ~40% on 10,000+ row datasets, and currently interning as an AI/ML Engineer at Blujay Technologies building a production LLM-powered chatbot. Independently built four end-to-end Python projects, including an ML- and Generative-AI-powered farming platform backed by a co-authored research paper.

TECHNICAL SKILLS

- Languages: Python, SQL, JavaScript, HTML, CSS
- AI / ML & Generative AI: Machine Learning, Random Forest, Linear Regression, PyTorch, EfficientNet, Hugging Face Transformers, OpenAI API, Google Gemini API, Prompt Engineering, LLM Integration, Speech-to-Text
- Backend & APIs: Flask, FastAPI, REST APIs, JSON, Application Architecture, flask-limiter
- Security: AES Encryption, OTP Authentication, Secure Coding
- Data & BI: Pandas, Matplotlib, Excel (Pivot Tables), Power BI, Exploratory Data Analysis
- Frontend & Mobile: React, Vite, Flutter
- Tools & Platforms: Git, GitHub, MySQL, Docker, FFmpeg.wasm, n8n, MS Office
- Concepts: OOP, Data Structures & Algorithms, Logging, Debugging, Problem Solving

PROFESSIONAL EXPERIENCE

AI/ML Intern — Blujay Technologies 2026 – Present

- Building a production AI chatbot for the Blujay Technologies company website using Flask and the Google Gemini API
- Implemented conversation memory, response caching, multilingual (Hindi/Telugu) query handling, and API quota protection via flask-limiter
- Added AI-generated follow-up suggestion chips and CSV-based lead capture to support the sales pipeline

Data Analytics Intern — Paarsh Infotech Pvt. Ltd., Nashik Dec 2024 – Feb 2025

- Preprocessed 10,000+ row business datasets (missing values, outliers, formatting), cutting data preparation time by ~40%
- Built EDA reports and Python visualizations (Pandas, Matplotlib) surfacing 5+ actionable business trends
- Benchmarked 4+ ML algorithms on accuracy, precision, recall, and F1-score to select the best-performing model
- Built Power BI dashboards translating raw data into stakeholder-ready reports; documented reproducible analysis workflows

PROJECTS

AI Interview Preparation Assistant In Progress

Python · LLM Integration · Speech-to-Text

- Building an interview-prep platform that asks real-time questions, converts speech to text, and evaluates answers using an LLM
- Generates an end-of-session analysis report along with model answers for each question

Smart Farming Assistant — AI-Powered Crop Advisory Platform Mar 2025 – Present

Python · Random Forest · Linear Regression · OpenAI API · FastAPI · REST API

- Built three ML models — yield prediction, crop price forecasting, and disease detection — trained on real agricultural data and served via REST API
- Added an OpenAI-powered Q&A assistant so farmers can ask questions in plain language and get real-time answers
- Designed separate farmer and merchant login flows for crop listing/selling and buyer discovery in a single codebase
- Co-authored a research paper validating the Random Forest models, achieving R^2 scores of ~0.94 on price forecasting

Bank of Python — Secure Banking Simulation System Academic Project

Python · AES Encryption · JSON · OTP · Secure Coding · Logging

- Built a modular banking simulation covering onboarding, authentication, and fund transfers, with AES-encrypted sensitive fields
- Added OTP verification, automatic lockout after failed logins, forced password rotation, and full event logging for auditability

EDUCATION

B.E. in Computer Science Engineering — Maulana Mukhtar Nadavi Technical Campus, Malegaon (SPPU) 2022 – 2026

CGPA: 8.19 · 5th rank in final year · Star Performer of the batch

HSC (Class XII), Maharashtra State Board 2022 — 80.67%

SSC (Class X), Maharashtra State Board 2020 — 86.60%

- Achievements: co-authored a research paper on the Smart Farming Assistant's ML performance; won multiple inter-college debate competitions; organized cultural/academic programs in school and junior college
